PROJECTS

Daimlas People Ecosystem (06/2023 - Present)

- "Daimlas People Ecosystem" is a Team management application. My role in this project as a front-end developer was to integrate the front-end application with the back-end application and maintain the application's state at the front end. I prioritized delivering an optimal user experience by meticulously crafting the process of API calls and proficiently managing client-server communication.

Daimlas Data Visualization (03/2023 - 06/2023)

- "Daimlas Data Visualization" is a tool for visualizing project progress. In this project, I took the responsibility as a Lead UI Developer. The project was challenging and it was tailored for extra-large screens. By finishing this project. I gained confidence in building a responsive web application while following desktop-first design thinking.

E-cart (Capstone Project)

- This Capstone Project Mimics the functionality of an E-commerce platform and allow users to perform actions such as , search product, add to cart, place order and view summary. By doing this project I learned to extract the technical requirements from user story and comeup with the solution to achieve the applications goal.
